Dashboard Functionality

Dashboard Feature	Your Request
Reference dashboard	Build a new dashboard to display the starting and ending locations, aggregated by location. This should show the number of trips at starting locations.
Access	Access will be provided as read-only to the user profiles listed in this document

Scope	Fields include: station, zip code, neighborhood, borough, year, month, trip count, weather
Date filters and granularity	Data filters can be applied for the following: Date, Month, Year Granularity: Any chart with user detail metrics should have the ability to click on that metric to view specific information.
